

**Biostatistical Research Analyst Intern for Global Health Research Center**  
**Duke Kunshan University**  
**Job Description**

**Position Overview:**

The Global Health Research Center is seeking biostatistical research analyst interns to assist with various research projects in Prof. Chenkai Wu's lab such as (1) Epidemiology and clinical implications of frailty among older adults, (2) Medication and dietary supplement use among older adults, and (3) Healthy aging and resilience. This position provides a great opportunity for students with hands-on experience in various aspects of conducting quantitative research (data analysis, manuscript writing, presentation, etc.).

**Reports to:**

Professor Chenkai Wu, Global Health Research Center

<https://dukekunshan.edu.cn/en/global-health/global-health-research-center/full-time-faculty>

**Essential Duties:**

- Work on data management and analysis using STATA, SAS, or R for research projects
- Provide assistance to other research work including but not limited to statistical section of grant proposals, systematic literature review, manuscript writing, and conference presentation.
- Any other research-related tasks required by supervisor.

**Qualifications:**

- Proficient in using Stata, SAS, or R for data management, analysis, and presentation
- Strong interest in aging or non-communicable disease research
- Able to work full-time for at least 4 months
- Good English writing skills
- Preferably have intention to apply for MS or PhD program in the near future

**How to Apply:**

Positions are open until filled. Please submit the information below to [dkurecruitment-intern@dukekunshan.edu.cn](mailto:dkurecruitment-intern@dukekunshan.edu.cn) and [chenkai.wu@dukekunshan.edu.cn](mailto:chenkai.wu@dukekunshan.edu.cn)

- A half-page description of qualifications

### **About the Global Health Research Center**

Duke Kunshan University and the Duke Global Health Institute established the Global Health Research Center in 2013. The Center uses innovative approaches to research and solve important health and health policy challenges in China and around the world.

The Global Health Research Center is built on the principles of scientific excellence and focuses on establishing interdisciplinary, mutually-beneficial collaborations with researchers from China. It will host national and international conferences to disseminate research findings and encourage dialogue among scientists, professionals, policy-makers and other key stakeholders engaged in global health.

The faculty and research activities complement the global health education programs offered at DKU, including the Master of Science in Global Health and the undergraduate semester courses in global health.
